

Avadex[®] Excel 15G

**Registration update on
Avadex Excel 15G (MAPP: 12109)**

Current situation until 31st December 2015

Rate: 15 Kg/Ha for all crops

Approval for:

**Winter wheat, winter and spring barley,
winter rye, triticale, Spring Beans, Peas (Vining,
dried & seed), *Forage Legumes, Sugar beet,
Fodder beet, Red beet and Mangels**

****EAMU's for:**

**Spring Wheat, Winter & Spring Oilseed rape,
Winter & Spring Linseed, Lupins, Outdoor
Broad beans and Canary seed**

Best Practice

- **Consult the label for crop specific advice and information.**
- **Ensure accurate calibration of application equipment.**
- **If it's too windy to spray then it's too windy to apply Avadex.**

* Forage Legumes (Peas, Lucerne, Sainfoin, Red Clover, White Clover, Vetches and Tares)

**Users must have a copy of the appropriate EAMU before application

Avadex[®] Excel 15G

Sell-out and Use-up Period

Product with labels bearing MAPP No: 12109 must be sold and placed onto farm by 31st December 2015.

Growers must use this product by 31st December 2016.

Growers planning to use Avadex on Spring crops in 2016 will need to plan forward and purchase product for delivery before the end of December this year.

A new MAPP No: 16998 will replace the current one in 2016 and details of the new label and approvals will become available then.
