**Growth stage**

Crops across the country are now in flower. Growers should have applied the last of the nitrogen applications to linseed during green bud stage (see in picture below).

**Linseed in Hampshire (LHS) and Cambridgeshire (RHS)**

**Later flowering fungicide**

While the weather recently has been dry, a fungicide to keep bolls green and free of any Botrytis and Pasmio infections. Fungicides should be applied when there are more bolls than flowers seen in the crop.

A suitable product would be:

Product	Rate	Notes
Folicur	0.75l/ha	At the end of flowering

*Ensure annual maximum rates of tebuconazole are not exceeded*

**Contacts**

If in doubt, consult your agronomist on any of the points.

Our agronomist Hannah Foxall is also happy to take your calls on questions or queries you might have.

Tel: 02392 632883 Mobile: 07786413815
